

Operating instructions for The Swinging Sticks® Basic Edition

Thank you for choosing **The Swinging Sticks®**!

This fascinating kinetic sculpture brings dynamic movement and calming serenity to your everyday life. To fully enjoy the magic of this masterpiece, please follow the instructions below.

1. scope of delivery

- 1x The Swinging Sticks® Sculpture - Basic (TSST model)
- 1x operating instructions

2. batteries required

- **4x 1.5V AA LR6 alkaline batteries** are required for the Basic Edition.
- **Running time:** With a fresh set of batteries, you can expect a maximum of **3 months** continuous operation depending on the ambient conditions.
- **Important notes:**
 - ⚠ Do not use rechargeable batteries (**1.2V**) as they may impair the function.
 - ⚠ A quiet ticking is not a fault, it occurs when the electromagnetic impulse drive magnetically pushes the rod.

3. commissioning

1. **Insert batteries:**
 - Open the battery compartment on the underside of the base.
 - ⚠ Avoid touching the battery contacts with bare fingers ⚠
 - Insert the batteries according to the indicated polarity (+/-). ⚠ (Roll the batteries in the compartment if the bars do not start)
 - ⚠ **Caution:** Avoid touching the moving rods during battery replacement as this could bend the axle.

Start movement:

- Make sure that the moving rods can move freely.
- Position the long rod horizontally at a 90 degree angle.
- Carefully release the rod - the sculpture will automatically begin its magical movement.

Sleep mode:

- If you do not want to use the sculpture, place both rods **in a vertical position** for at least **5 seconds**.
- The sculpture switches to sleep mode and reduces energy consumption by up to 90%

4. care instructions

- **Cleaning:**
Clean the base and the rods carefully with a **soft, dry cloth**. Avoid aggressive cleaning agents or water to prevent damage to the surface or electronics.
- **Placement:**
Place the sculpture on a **stable, level surface**. Direct sunlight and high humidity should be avoided as these could impair the function.

5. important notes

- ⚠ **Avoid contact:** Do not touch the moving rods during operation so as not to impair the technology.
- ⚠ **Electromagnetic fields:** There are strong magnets in the vibrating rods. Place the sculpture away from strong electromagnetic fields (e.g. loudspeakers or monitors) to ensure interference-free operation.
- ⚠ **Thermal influences:** Open windows, air conditioning systems, fans or radiators can influence the movements of the sculpture. This is normal and does not indicate a defect.

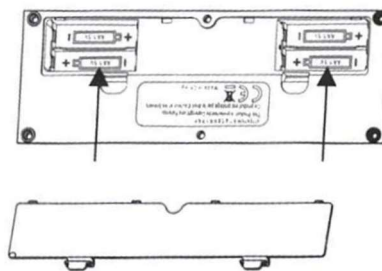

6. Warranty and support

If you have any questions about operation or need technical support, our friendly **customer service team** is always on hand to help. Visit our website or contact us directly

With these tips, we wish you lots of fun and fascinating moments with your The Swinging Sticks®!

Product Safety Regulation - General Product Safety Regulation (GPSR)

Product information

- **Product name:** The Swinging Sticks®
- **Manufacturer:** BTS Trading GmbH
- **Product description:** A fascinating kinetic sculpture that is kept in gentle, continuous motion by precise electromagnetic impulses.

• **Product safety**

• **Purpose and use**

The Swinging Sticks® has been designed as a decorative piece of art for interiors, adding a touch of elegance and calm to any room. This product is intended for adults only and is not suitable as a toy for children.

• **Mechanical safety**

1. The sculpture has no sharp edges or easily detachable small parts that could pose a safety risk.
2. All components are firmly integrated and cannot be accidentally removed or swallowed.

• **Electrical safety**

1. It is powered exclusively by batteries (no external power source required).
2. Thanks to the lack of direct electrical connections, the product offers maximum safety for the user.
3. The recommended battery type is clearly indicated: Rechargeable 1.2V batteries are not suitable to ensure optimum performance.

• **Chemical safety**

1. No hazardous chemicals or materials are used.
2. All materials used comply with the EU's strict REACH regulations.

• **Disposal and recycling**

1. Please dispose of the product in accordance with the applicable local recycling guidelines.
 2. Batteries should be recycled separately to avoid environmental damage.
-

Instructions for use

⚠ **Precautionary measures:**

- Avoid touching the moving rods during operation so as not to damage the sensitive axle.
- Place the sculpture on a stable, level surface to ensure smooth operation.
- Direct sunlight and humid environments should be avoided as they can impair movement or the mechanism.

Maintenance and care:

- Clean the sculpture gently with a dry, soft cloth. Do not use aggressive cleaning agents or water.
 - Check the battery status regularly to ensure uninterrupted movement.
-

Product liability and recall

- **Exclusion of liability:** BTS Trading GmbH accepts no responsibility for damage caused by improper use or modification of the product.
 - **Recall measures:** If safety problems occur, affected customers will be informed immediately and appropriate recall actions will be initiated.
-

CE marking and declaration of conformity

The Swinging Sticks® complies with EU regulations and bears the CE mark, which confirms compliance with the highest product safety standards.
